| <input type="text"/> | <input type="text"/> | <input type="text"/> |

Use one row per check-in. Blank cells are fine - consistency matters more than filling every box.

[illegible]

- Count resting breathing rate only if your veterinarian wants you to track it; note the cat's state at the time.
- Record cough/wheeze episodes, breathing effort, posture and anything that may have preceded the episode.
- Record rescue or controller medication exactly as prescribed and note what was actually given.
