PHONE

Daily log

Use one row per check-in. Blank cells are fine - consistency matters more than filling every box.

Date / time	Food / appetite	Water	Weight	Vomiting / stool	Medication given	Behavior / notes

HOW TO USE THIS TRACKER

- Use the medication schedule prescribed by your veterinarian; record doses actually given.
- Weight loss can be important even when appetite is strong, so regular weight notes are useful.
- Note vomiting, diarrhea, unusual restlessness, vocalizing, or changes in grooming.

Hyperthyroidism Tracker

Weekly summary and veterinary appointment prep.

REMINDERS

- Use the medication schedule prescribed by your veterinarian; record doses actually given.
- Weight loss can be important even when appetite is strong, so regular weight notes are useful.
- Note vomiting, diarrhea, unusual restlessness, vocalizing, or changes in grooming.
- Veterinary follow-up commonly includes thyroid testing and checks for kidney, heart, blood-pressure, or medication-related issues.
